Art Unit: 2816

1. Applicant's request for continuing examination (RCE) and the amendments to the claims are now entered in the case.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claim 9 is objected to because of the following informalities: On line 10, "connects" should be changed to --connect--. Appropriate correction is required.

4. Claims 9-11 and 16-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al.

As to claim 9, note figure 2, where the first channel is channel Ch0; the second channel is channel Ch1; the first differential amplifier is the combination of transistors 206 and 208; the second differential amplifier is the combination of transistors 210 and 212; the first input is the differential input formed by IN0 and IN0B; the second input is the differential input formed by IN1 and IN1B; the first plurality of selection transistors are transistors 246 and 215; the second plurality of selection

Art Unit: 2816

transistors are transistors 248 and 219; and the functional recitation on the last three lines of claim 9 are deemed to be inherent in the operation of the Chang et al figure 2 circuitry. As to claim 10, the first and second select inputs are control signals C and /C. As to claim 11, the first and second subsets are one of transistors 246 in 215, and one of transistors 248 and 219. Claims 16 - 18 are rejected based on the same interpretation of Chang et al's figure 2 circuitry.

5. Claims 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Smetana.

Note figure 7B, where the input signals are the signals BLP, BLN and ALP, ALN; the differential amplifiers are the combinations of transistors 796, 804 and 860, 862. The selection transistors are transistors 756, 764, 780, 788, 852, 854, 856 and 858. The output is at line 772 or line 718.

6. Claims 1 and 4-8 are allowed.

Claims 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in

Art Unit: 2816

independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's arguments with respect to claims 9-11 and 16-20 have been considered but are moot in view of the new ground(s) of rejection.

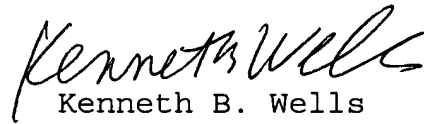

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at (571)272-1740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
